COLLEGE OF BUSINESS
INFORMATION SYSTEMS DEPARTMENT

1600 Holloway Avenue
San Francisco, CA 94132

San Francisco State University

- Part of the California State University system
 - 23 campuses, 450,000+ students, 24,000+ faculty
- San Francisco State University
 - 8 colleges
 - 30,000+ students
 - Undergraduate: 24,000 +
 - Graduate: 6,000 +
 - Faculty: 1,800 +

Disclaimer

- I do not work for OLPC!
- Enthusiast, researcher, developer
 - Interests
 - Free and Open Source Software and Content
 - Internationalization/Localization
 - User Interface Design
 - Networks
 - IT Sustainability

Disruptive

- OLPC: Excellent example of disruptive technology innovation
 - Education: learning is student-driven
 - Hardware: sustainable computing at its best
 - Software: power of Free and Open Source at work
 - Content: a public commons of content

*Somebody is finally
thinking of the
children!*

Education

- *Its an education project, not a laptop project.*
 - Nicholas Negroponte, Founder - OLPC
- OLPC's Goal:
 - *To provide children around the world with new opportunities to explore, experiment and express themselves.*

A different generation...

Sugar: a different interface

The XO laptop runs on Linux, a free and open-source operating system. OLPC's commitment to software freedom gives children the opportunity to use their laptops on their own terms. The children—and their teachers—have the freedom to reshape, reinvent, and reapply their software, hardware, and content. There's even a button located on the keyboard that allows children to view the programming behind certain applications. The XO laptop's revolutionary interface, Sugar, also promotes sharing and learning.

Browse

Sugar

- Focus on activities, not applications
 - “Write” a letter vs. “use” Microsoft Word
 - Educational vs. Vocational
- Run your own Sugar environment!
 - Download ISO image at <http://wiki.laptop.org/go/LiveCD>
 - Burn to CD.
 - Boot computer with CD. No installation required!

Activities

- Write 
 - *A simple word processor*
- Chat 
 - *XMPP based. Same as Google Talk*
- Browse 
 - *Firefox-based + flash + AJAX*
- Record 
 - *stills and video*

More activities... <http://wiki.laptop.org/go/Activities>

One forward, One right

The image shows a screenshot of a programming environment, likely Scratch, with a dark grey header. The header contains the text "TurteArt Activity" on the left, "Share with: Private" in the center, and icons for a folder and a square on the right. Below the header, there are two tabs: "Activity" and "Project".

The main workspace is a light yellow area. On the left, there is a vertical toolbar with a yellow background and the word "Flow" at the top. The toolbar contains several icons: a turtle, a pencil, a number "123", a refresh symbol, a stop stack icon, and a hand icon. A red 'X' is at the bottom of the toolbar.

In the center of the workspace, there is a script block starting with a "repeat" block set to "360". Inside the "repeat" block, there are three sub-blocks: a green "forward" block with a value of "1", an orange "wait" block with a value of "1", and a green "right" block with a value of "1".

Below the script block, there is a small green turtle icon at the start of a red circular line, representing the path of the turtle.

On the right side of the workspace, there are three icons: a list icon, a USB drive icon, and a hand icon.

the XO laptop

Laptop

- 7.5 inch diagonal screen at 1200x900 (200 dpi)
 - Sunlight readable!
- Wi-Fi, USB, microphone, speakers, camera, SD card slot
- Screen rotates to tablet mode
- Water resistant keyboard
- Dust resistant design

More laptop

- Laptop, turned on its head
 - All electronics are in the upper section, except the keyboard.
 - Easy to replace components
 - Carry handle also acts as base stabilizer
 - Wi-Fi rabbit ears double up as latches and increase range
 - Any 11 to 24 volt power supply will do
 - wall charger, car battery, crank/yoyo power, solar panel

Yo Yo Charger

<http://www.potenco.com/products>

Hand Crank Charger

http://wiki.laptop.org/go/Peripherals/Hand_Crank

Solar Panel

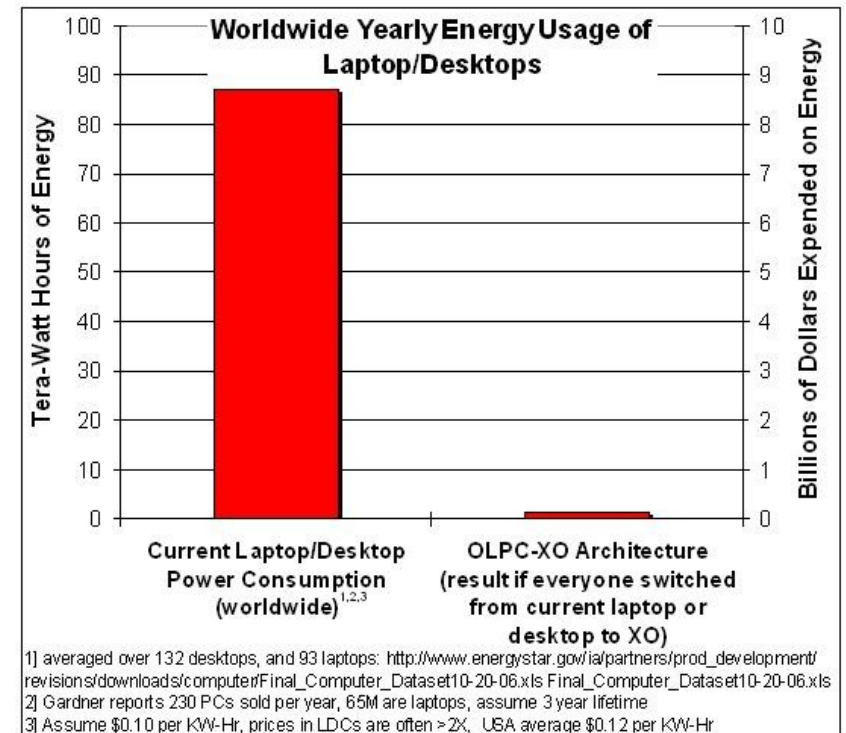

5 Watt/14Volt panel

http://wiki.laptop.org/go/Product_News#Solar_Panels

Green

- Looks green, works green
 - Fully recyclable
 - 5 year life span
 - Idle power consumption
 - Desktop – 80 watts
 - Laptop – 25 to 60 watts
 - OLPC – 1 to 8 watts

Power

- Batteries that last 4x longer
 - Lithium Iron Phosphate (LiFePO_4)
 - Currently at ~ 5hrs, final goal ~10 hrs
- 0.1 watt in sunlight readable mode
- Running at full blast
 - Wi-Fi, full backlight, camera, microphone, speakers
 - 7 to 8 watts

Mesh Networking

- Mesh does not require central hub-like infrastructure
- Wireless mesh works even when the CPU powers off

No moving parts

- No fans, no hard drive, *nothing* spins.
 - 1GB Flash + 256 MB RAM
 - USB storage
 - SD slot
- AMD Geode processor runs cool.
 - Does not need a fan to cool it off
 - No air slots or ducts

Linux in the box

FOSS: Free and Open Source

- When the project started FOSS was the only option that was flexible enough for this project
- No vendor lock-in on formats
- No royalties on redistribution
- No discrimination based on fields of endeavor
