

## Simple connection: Solar panel to Laptop

20W module

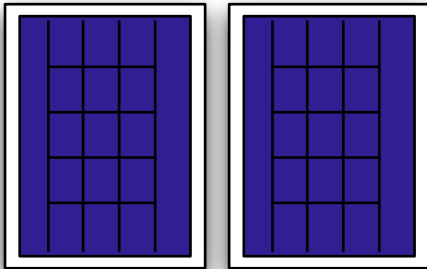

20W will take approximately 5 hours to charge a dead laptop to full in good sun,

Larger solar module will charge the laptop faster.

## Charging multiple laptops

100W modules (or more)

Combiner  
box  
(modules wired  
in parallel)

Terminal  
Block

Each 100W can charge 3 laptops simultaneously for 5 hours, or one laptop about 3 times faster
