

# XOP *Safe and cost effective power solution for the classroom*

## Improved Child Safety

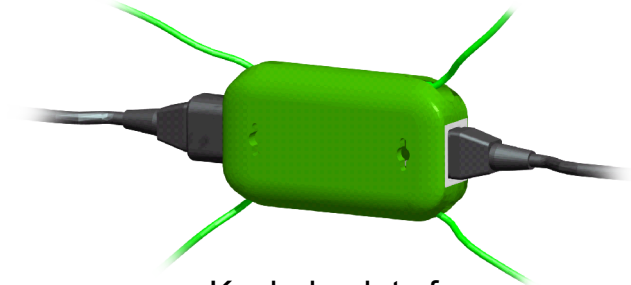

- Low voltage power outlets keep children away from dangerous voltages
- Less and easier cable management

## Enhanced Educational Experience

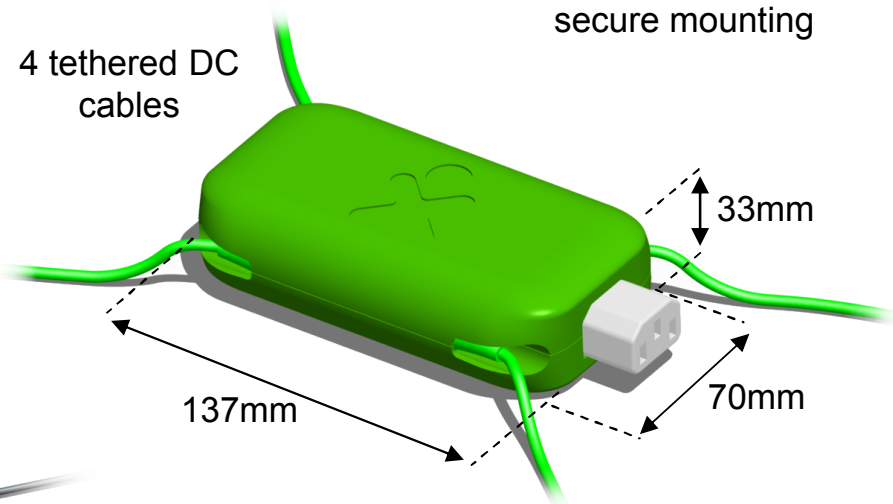

- Power available without student distraction
- Enables optimal classroom configuration

## XO Investment Protection

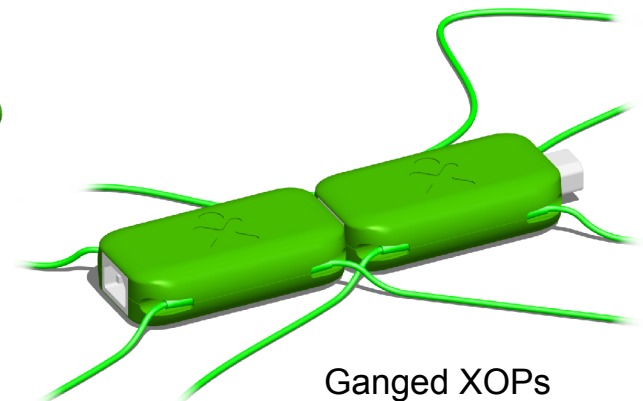

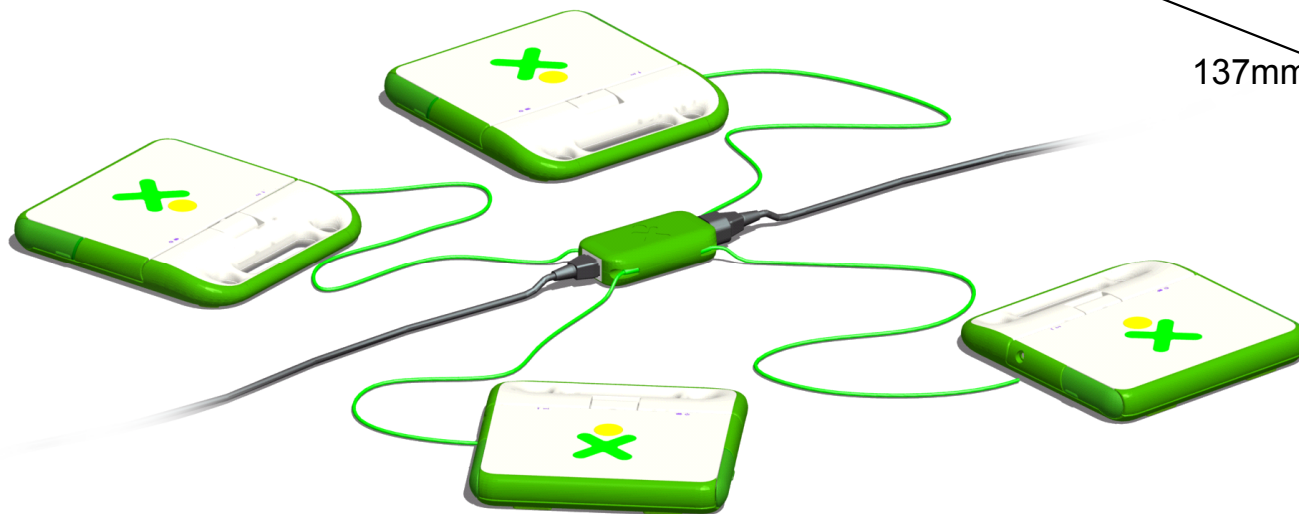

- Reduce the risk of XO damage from wire tripping
- Power adapters stay safely at home
- Increase battery life expectancy

Keyhole slots for secure mounting

4 tethered DC cables

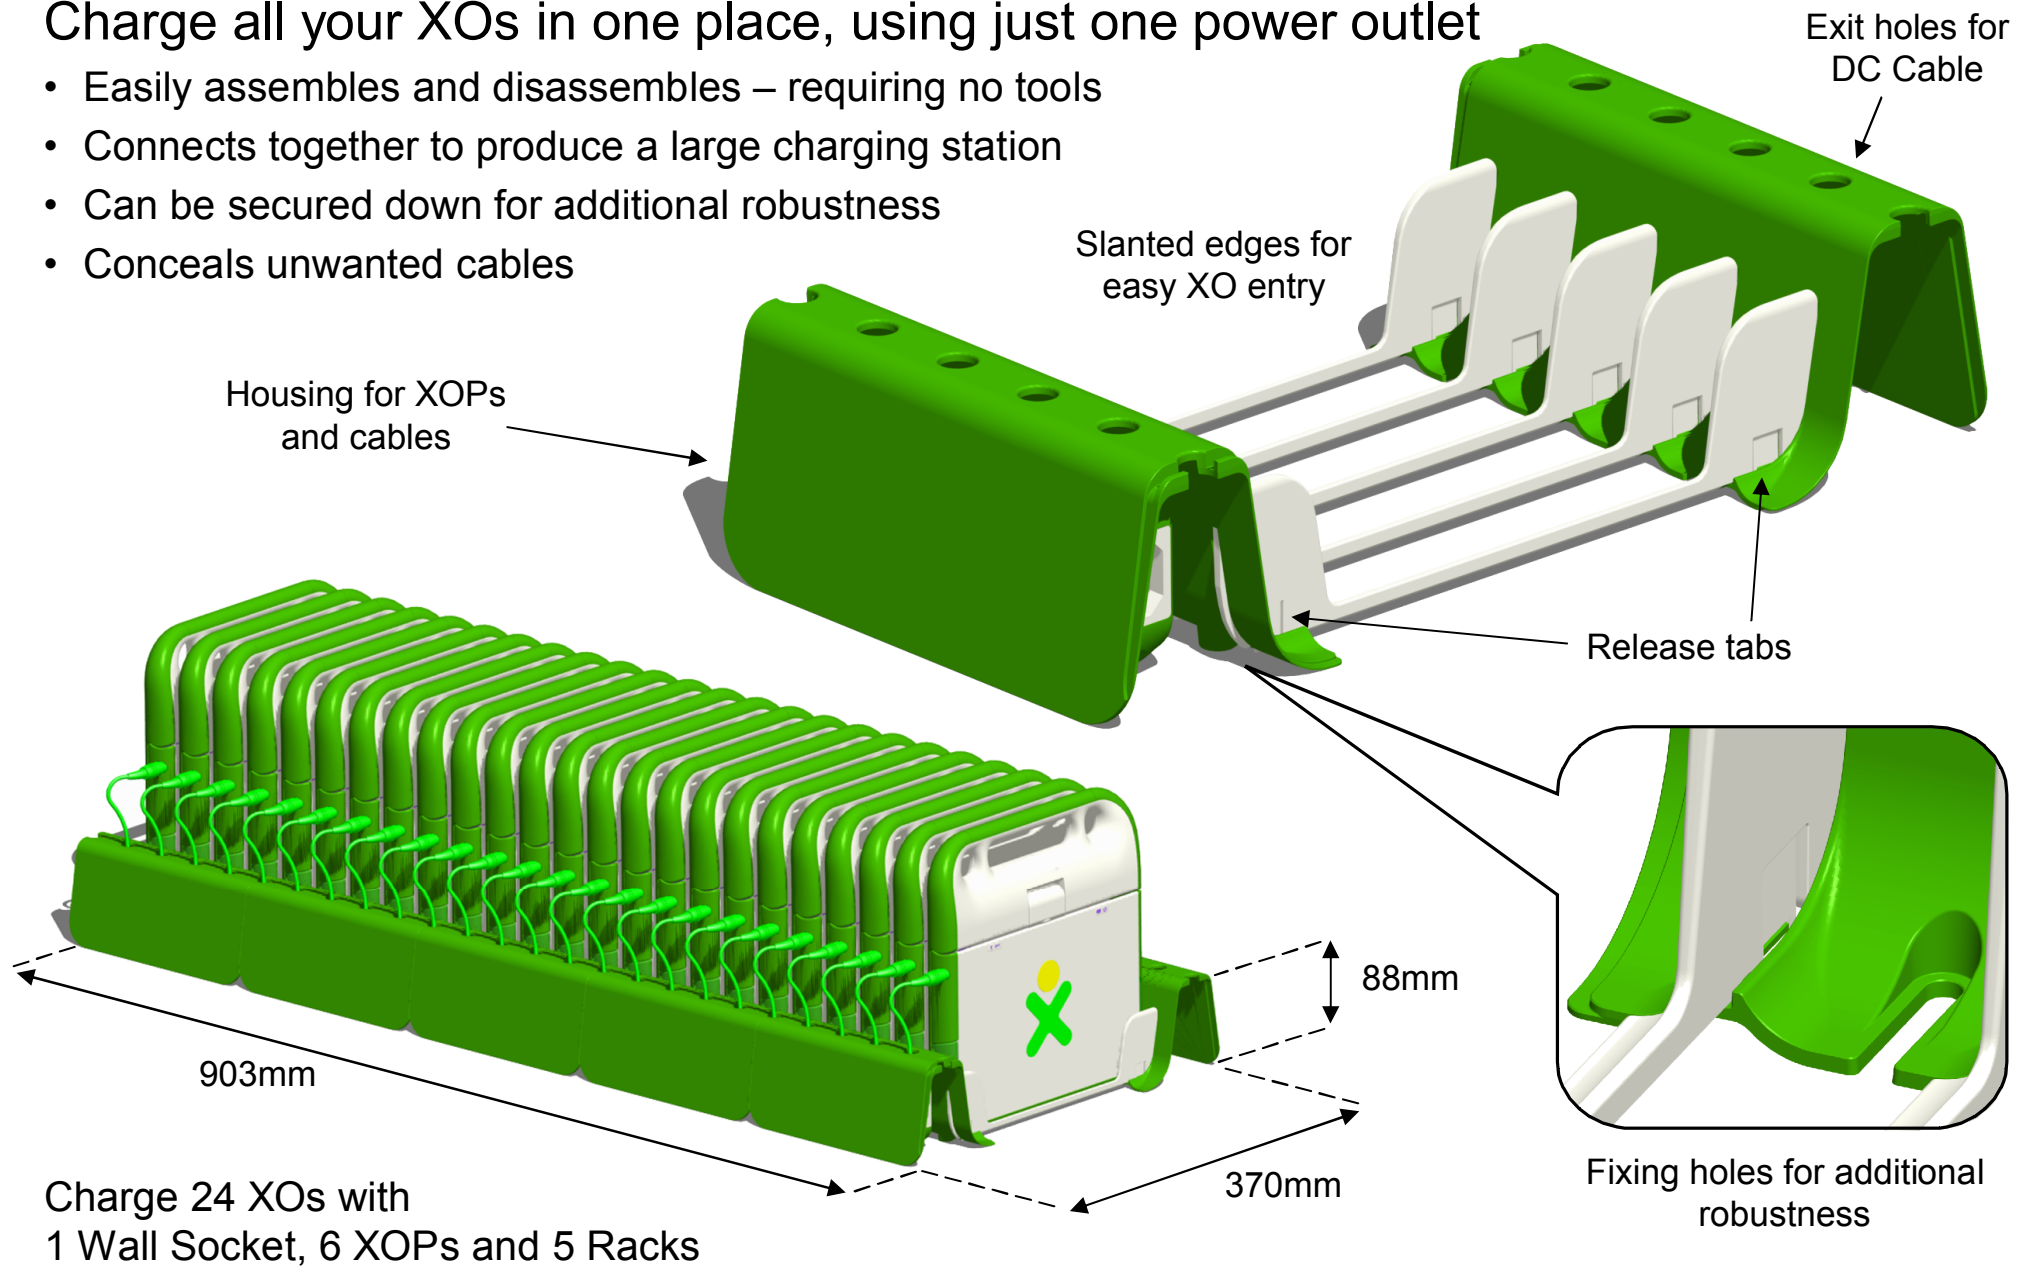

Ganged XOPs

A child friendly daisy chainable XOP power adapter with four low voltage outlets that requires only one wall socket to power a classroom of XOs

# **XOP Rack** *Safe, convenient, compact and cost effective*

Charge all your XOs in one place, using just one power outlet

- Easily assembles and disassembles – requiring no tools
- Connects together to produce a large charging station
- Can be secured down for additional robustness
- Conceals unwanted cables

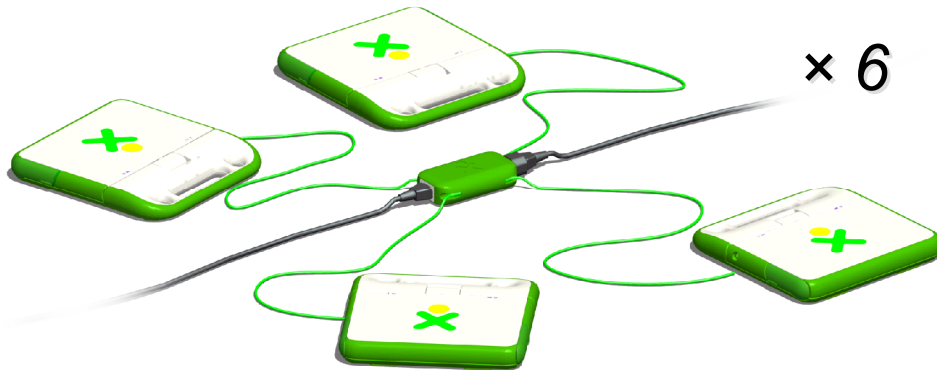

# ***XOP Bundles*** *A classroom power solution in a box*

## ***Distributed***

Everything you need to offer power at the sitting locations of 24 students. All you need is a single wall socket
